STEP BY STEP IMPLEMENTATION

STEP BY STEP IMPLEMENTATION

On this site, you will find links to pages that will help you have a successful implementation into your purchase path.

Share this page with your Design, Technical, and Marketing teams.

DESIGN STEPS

1. Once your offer design is complete, we will need to review and approve. Ideally, this is done prior to the build. Please send your designs in format we can comment on (Figma, PDF, etc) to implementations@battleface.com.
2. Once we approve the design, we will notify you so your build can begin.
3. Please note that any changes after final approval will need to be reviewed.
4. Should you have any questions, please contact implementations@battleface.com.

TECHNICAL STEPS

1. Review the API Documentation. The calls will go to a staging area and not production. You will receive the production key at the end of the process. Please pay close attention to the v2 information as your product will be on the v2 platform.
2. When your API build is complete, you'll need to run some tests. battleface will also need access to your environment for testing.
3. Once all our tests have passed, we will email a launch approval and provide your production keys.
4. Please note that any changes after final approval will need to be reviewed.
5. Should you have any questions, please contact implementations@battleface.com.

MARKETING STEPS

1. Work with our team at marketing@battleface.com to make sure you have all the information to successfully reach your target market.
2. Please note that all marketing items will need to be reviewed prior to release.
3. Should you have any questions, please contact marketing@battleface.com.
